COMPANY OVERVIEW

Who **We** Are

Siaac Group is a solutions-focused leader in commercial and industrial (C&I) solar, driving Africa's energy transition through innovation, agility, and expertise.

We provide end-to-end solutions that streamline procurement, financing, and deployment. By **partnering with EPCs, IPPs, and developers**, we accelerate Africa's energy transition with cutting-edge solar technologies and strategic expertise.

We bring **customer centricity** to every solution, delivering reliable, integrated systems that fight climate change and reduce carbon emissions—**moving projects forward, faster.**

Accelerating Africa's Energy Transition

STRATEGIC ADVANTAGE

What We Do

We Partner with Energy Professionals to Provide:

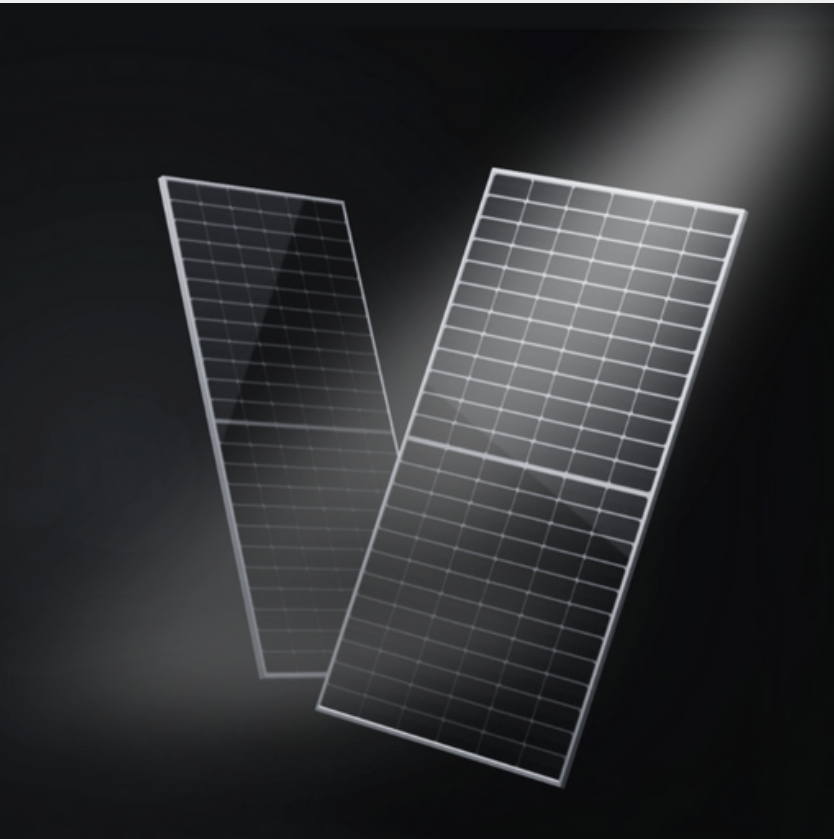

Integrated PV and Energy Storage Solutions
Best-in-class Components (Inverters, Batteries, Mounting, Electrical, Cabling)
Design, Engineering & Finance Support
Warehousing, Fulfilment & Logistics
Technical Support & Warranty Assistance

Where Insight Meets Action to **Deliver Lasting Impact**

- Southern Africa-wide reach
- Financing alignment with project needs
- Pre- and post-sales support
- Trusted by top EPCs, developers & finance partners
- Distribution and technical partner for premium global brands

Where insight meets action for lasting impact.

Sigenergy

Advanced hybrid ESS & AI-optimised inverters for C&I, hospitality, and residential.

enerSol

High-performance PV modules engineered for African conditions.

Jinko Solar

Tier-1 PV modules with leading efficiency and reliability.

Himel

Utility-grade switchgear and protection solutions engineered for high-performance C&I

K2 Systems

Premium mounting structures for rooftop and ground-mount projects.

NOARK

Premium switchgear and protection devices for utility-scale and C&I projects.

OUR BRANDS & PARTNERS

Premium Brands We Represent

At **Siaac Group**, we don't just distribute products—we curate a complementary, robust portfolio designed for Southern Africa's EPC needs. We work closely with our brands' O&M and R&D teams to ensure every product meets project demands with reliability and performance. Our focus is on empowering your projects with solutions that fit seamlessly, function effectively, and drive success in the field.

Carefully curated. Technically aligned. Project ready.

CUSTOM DESIGN & PROJECT SUPPORT

Engineered for Project **Success**

01

Custom System Design Support

Detailed system designs optimised for your site, load profile, and production goals. 3D simulations ensure design accuracy before installation begins. Enabling faster, seamless deployments for every project.

02

Custom Engineered Innovations

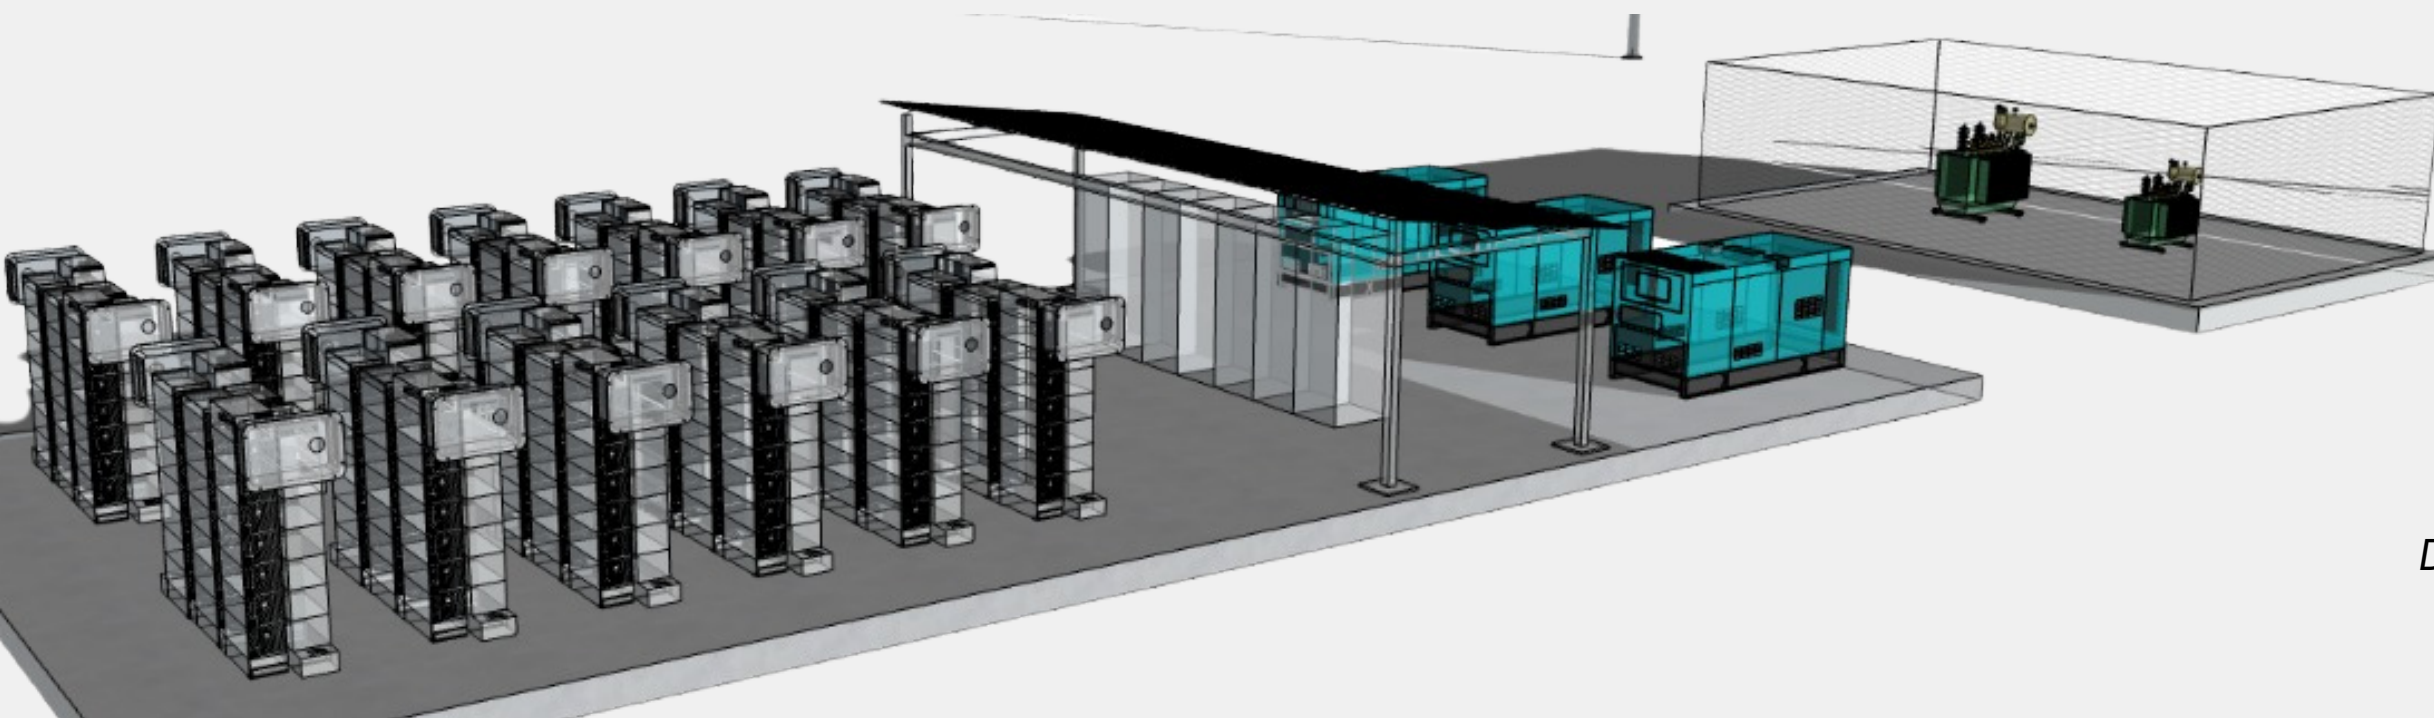

We partner with brand O&M and R&D teams to solve project-specific challenges. Developing custom product adaptations and new solutions for EPC needs. Ensuring every system is engineered to meet real-world project demands.

03

Facilitated Support

Hands-on guidance and expert assistance from concept to post-installation. Accelerated warranty claims and technical issue resolution. Fast, solutions-focused support whenever you need it.

Driving projects forward, faster.

FEATURED PROJECTS

Where Expertise Meets
Execution

Our partners trust us to deliver products and support that drive successful projects across Southern Africa. From commercial rooftops to utility-scale ground mounts and advanced energy storage, these projects showcase the capabilities of our brands and the expertise of our EPC partners.

Powered by SIAAC's curated product portfolio and technical support. These featured projects demonstrate what's possible when robust products and expert execution align. Together, we're accelerating clean energy adoption with technically robust, real-world solutions.
